WHAT'S NEW WITH THE IPAD AND MUSIC EDUCATION (2020)

WHERE ARE WE AT?
WHAT’S NEW WITH THE IPAD AND MUSIC EDUCATION
WHERE ARE WE AT?

- In 2018 (latest data) Chromebooks made up 60% of computer/tablet purchases in schools (CNBC)
- 30 Million Chromebooks being used in education (9to5Google)
- 80 Million GSuite for Education Users (9to5Google)
- 40 Million Google Classroom Users (9to5Google)

CHROMEBOOKS HAVE WON THE BATTLE
WHAT’S NEW WITH THE IPAD AND MUSIC EDUCATION
WHERE ARE WE AT?

• There are very good subscription based services, but the key issues of the Chromebook in Music Education are not being addressed.
  • Most schools are not buying touch or especially flip models which are desperately needed in music education.
  • Most schools do not pay for student access to subscription based solutions
  • Most solutions are outegration vs. integration
  • Most music teachers are teaching in much the same way that we taught music in the 1950s.
• We are losing students to STEM programs, even with ESSA and STEAM
WHAT’S NEW WITH THE IPAD AND MUSIC EDUCATION
WHERE ARE WE AT?

• In the end, many schools are choosing a single device, and replacing EOL iPads with Chromebooks

• The iPad isn’t perfect...
  • Expensive to repair
  • MDM (device management) is expensive (JAMF)
  • Behavioral management (Apple Classroom) is flawed
  • Proper use requires a blend of teaching Digital Citizenship and an iron fist

WHERE ARE WE AT?

• While your school may be leaving iPads, they still have greater potential for music educators as a personal or professional device than a Chromebook

• If an IT manager or principal is educated about music education, they will know that the *educational* Chromebook isn’t a great fit for music—especially performance-based classes

• It is 100% reasonable to request a new or updated iPad for your own use

• Depending on your situation, you may be able to request a small number of iPads for students to use

• Or you might be able to claim a cart of iPads that are not EOL, but simply being replaced in your classroom (Don’t claim EOL devices)
The iPad continues as a device, unmatched in its form factor, with continual improvements. Hardware examples:

- iPad Pro is 85% of the speed of current MacBooks.
- Apple Pencil (1st and 2nd Generations exist)
- 7th Generation iPad $329 (less for education) (10.2 inch) (O.K. to buy)
- iOS 13 (Mouse integration)...connect with your BT keyboard...computer experience on iOS
- “Sidecar” Extended Display

WHERE ARE WE AT?

• The music technology blogs have been very quiet
  • “New” at this time is evolutionary vs. revolutionary
  • The Chromebook’s “winning” has taken wind out of the sails
  • Online services keep improving but it is all evolutionary
  • There has been a lack of exciting hardware accessories (e.g. page turners, BLE MIDI)
  • There has been little change in how music is printed, distributed, sold, and used
  • Teachers haven’t changed practice to use what already exists
IT ISN’T AS MUCH “WHAT IS NEW?” AS “WHAT IS NEW TO YOU?”
IT IS UP TO US TO KEEP PUSHING THE BOUNDARIES AND TO ASK FOR MORE FUNCTIONALITY
I WOULD LIKE TO USE THIS TIME TO SHOW YOU SOME VERY PRACTICAL USES OF THE IPAD IN MUSIC EDUCATION

WHAT IS NEW TO YOU?

• Music Notation
  • The online services do work on iPad, to a point (Noteflight, flat.io)
  • There are a number of notation apps…I generally recommend Notion (works great with the Mac/Windows version)
    • Ease of use
    • Great sounds
    • Handwriting recognition
